

Amendments to the Claims:

This listing of claims will replace all prior versions, and listings, of claims in the application:

Listing of Claims:

1. (Currently Amended) A method in a data processing system for presenting input fields from a document, the method comprising:
parsing the document to identify ~~identifying~~ a selected indicator associated with a set of mandatory input fields in the document and presenting only the set of mandatory input fields.
2. (Original) The method of claim 1, wherein the presenting step comprises:
displaying the set of mandatory input fields in a window.
3. (Original) The method of claim 1, wherein the presenting step comprises:
reformatting the document to contain only the set of mandatory input fields.
4. (Original) The method of claim 1, wherein the presenting step comprises:
presenting a first input field from the set of mandatory input fields; and
responsive to information being entered in the first input field, presenting a second input field from the set of mandatory input fields.
5. (Original) The method of claim 1, wherein the indicator is a hypertext markup language tag.
6. (Original) The method of claim 1, wherein the document is a Web page.
7. (Currently Amended) The method of claim 1 further comprising:
determining whether any of the set of mandatory input fields correspond to pre-stored information; and
responsive to an input field within the set of mandatory input fields corresponding to pre-stored information, filling the input field within the set of mandatory input fields with the pre-stored information.
8. (Currently Amended) A data processing system for presenting input fields from a document, the data processing system comprising:

identifying means for identifying a selected indicator within a parsed document, the indicator being associated with a set of mandatory input fields in the document; and
presenting means for presenting only the set of mandatory input fields,

9. (Original) The data processing system of claim 8, wherein the presenting means comprises:
displaying means for displaying the set of mandatory input fields in a window.
10. (Original) The data processing system of claim 8, wherein the presenting means comprises:
reformatting means for reformatting the document to contain only the set of mandatory input fields.
11. (Original) The data processing system of claim 8, wherein the presenting means comprises:
first means for presenting a first input field from the set of mandatory input fields; and
second means for presenting a second input field from the set of mandatory input fields in response to information being entered in the first input field.
12. (Original) The data processing system of claim 8, wherein the indicator is a hypertext markup language tag.
13. (Original) The data processing system of claim 8, wherein the document is a Web page.
14. (Currently Amended) The data processing system of claim 8 further comprising:
determining means for determining whether any of the set of mandatory input fields correspond to pre-stored information; and
filling means for filling ~~[[the]]~~ an input field within the set of mandatory input fields with the pre-stored information in response to ~~[[an]]~~ the input field within the set of mandatory input fields corresponding to the pre-stored information.
15. (Currently Amended) A computer program product in a ~~computer-readable~~ recordable-type medium for presenting input fields from a document, the computer program product comprising:
first instructions for parsing the document to identify ~~identifying~~ a selected indicator associated with a set of mandatory input fields in the document; and
second instructions for presenting only the set of mandatory input fields,

16. (Original) The computer program product of claim 15, wherein the second instructions comprises:
sub-instructions for displaying the set of mandatory input fields in a window.
17. (Original) The computer program product of claim 15, wherein the second instructions comprises:
sub-instructions for reformatting the document to contain only the set of mandatory input fields.
18. (Original) The computer program product of claim 15, wherein the second instructions comprises:
first sub-instructions for presenting a first input field from the set of mandatory input fields; and
second sub-instructions for presenting a second input field from the set of mandatory input fields
in response to information being entered in the first input field.
19. (Canceled)
20. (Original) The computer program product of claim 15, wherein the document is a Web page.
21. (Currently Amended) The computer program product of claim 15 further comprising:
seventh instructions for determining whether any of the set of mandatory input fields correspond
to pre-stored information; and
eighth instructions for filling [[the]] an input field within the set of mandatory input fields
corresponding to pre-stored information with the pre-stored information in response to [[an]] the input
field within the set of mandatory input fields corresponding to the pre-stored information.
22. (Currently Amended) A server data processing for obtaining cultural context information from a
client, the server data processing system comprising:
a bus system;
a communications unit connected to the bus system;
a memory connected to the bus system, wherein the memory includes a set of instructions; and
a processing unit connected to the bus system, wherein the processing unit identifies a selected
indicator associated with a set of mandatory input fields in the document and presents only the set of
mandatory input fields, wherein the indicator is a hypertext markup language tag.
